

Spartan In Judging

Thomas Pettepiece, a South High School senior, has been named to compete in the YMCA finals of the Hi-Y Boy of the Year contest.

The 17-year-old youth is senior class president, national Hi-Y chaplain, Interclub Council past president and was a

candidate for governor of the YMCA Youth in Government program.

Torrance YMCA member Steven Bailey was one of eight quarter-finalists. A \$1,000 scholarship to the college of his choice will be awarded the first place winner while second place winner will receive a \$500 scholarship.

Winners will be named Jan. 24. They will be selected on basis of their participation in church and school activities, general character and Hi-Y.

Harvey Aluminum Forms International Division

Formation of an international division of Harvey Aluminum has been announced with the general manager's headquarters being located in Torrance.

The new division will be concerned particularly with establishing additional sources outside the United States for raw materials such as bauxite, fluorspar and carbon materials, as well as titanium, zirconium and rare minerals.

IN RECENT years the company has become increasingly active in the production and fabrication of rare and exotic

metals including columbium, molybdenum, uranium, tungsten, nickel, and cobalt alloys, and high alloy steels for high temperature applications.

Harvey Aluminum is also embarking on a program of establishing mining resources, primary production and fabricating facilities for aluminum, titanium, and other metals throughout the world in concert with various foreign interests; and these activities also will come under the direction of the International Division.

GENERAL MANAGER for

the new division will be Harold F. James, a veteran of 30 years' experience in the metals industry in the United States and abroad. James joined the staff of Harvey Aluminum in 1951, specializing in the field of plant expansion and fabrication activity.

He took leave of absence in 1958 to serve on the directorate of certain overseas metallurgical companies, returning recently to assume his new post. Although his base of operations will be the company headquarters in Torrance, James will spend much of his time visiting companies

throughout the world active in the fields of raw materials associated with aluminum, and other nonferrous metals industries.

The Old Timer

"It's not the minutes you spend eating—it's the seconds."

IN TOURNEY . . . Stan Ellis, program chairman for the Torrance YMCA, has reached the quarter finals in the Los Angeles Metropolitan Championship tennis eliminations now under way and will seek to gain the semifinals Saturday. He will face Dave Benish in singles matches Saturday morning, and will compete in mixed double play with Winnie McCoy and in men's doubles with Ron Pelton. The finals are scheduled for the weekend of Jan. 27.

... Report

(Continued From Page 1)
Chamber Manager Don R.

PEEBLES' PLAN, as outlined before the committee and set forth in detail in the report, calls for a program to provide strategically located, well-lighted parking lots; rehabilitation of store buildings, and general upgrading of the area through changes in street design, lighting, beautification.

Adoption of a master plan for the project was recommended by Post, who said such a plan would be necessary to assure coordination on the project.

AMONG THE specific recommendations contained in the Peebles report is that a parking lot be provided on Marcelina Avenue in the area between the Post Office and the alley to the north, and that one-way street patterns be inaugurated.

Other suggestions include center-of-street parking on Torrance Boulevard, redesign of the intersection of Torrance, Border, and Cabrillo adjacent to the Pacific Electric station, and redesign of other intersections.

HE ALSO recommends establishment of a parking committee composed of business men from the area with personnel serving in an advisory capacity.

Establishment of the redevelopment committee by Isen last week might be considered the fulfillment of the latter recommendation.

Members of the committee will be asked to study the comprehensive report and will probably schedule another meeting later this month, it was indicated.

Two Enter Race for City Clerk

Two more candidates announced intentions to seek office in the April municipal elections. Both will be candidates for the post of city clerk.

First to announce was Mrs. Rose Craig, Torrance realtor and civic leader, who resides at 4110 Carmen Ave.

Following closely with an announcement was Charles Deck, president of the Torrance Property Owners Assn., Inc., who resides at 20513 Toluca Ave.

Deck's announcement was dramatized with the erection of a sign at Carson Street and Crenshaw Boulevard stating "Elect Charles Deck — Tax Economist — for Torrance City Clerk."

Several other persons have been reportedly interested in the race but have not made formal announcements.

Know Your Traffic Laws

Prepared in Cooperation With the Torrance Police Department

A question raised by many drivers is, why are some of our streets posted with such a slow speed limit?

Each driver has his own opinion as to what would be a proper speed limit in addition to what would be safe. Speed zones are not based on guess work or opinion but based on facts and study.

When a street is posted, many factors are used to determine what the speed zone will be. A few of the factors are the type of area—residential, business, or open area—normal traffic flow, amount of traffic, type and width of street, engineering problems, accident rate, and several other factors.

All these factors are considered and from this traffic engineering arrives at what speed can and does account for many accidents, and this is why a great deal of study goes into establishing speed zones.

IF EACH of us would appreciate that the posted speed

limit has a great deal of meaning for all of us and abide by the speed that is posted, this would do much in preventing accidents.

There is little doubt that speed is a killer as statistics clearly show, but if speed is controlled and not allowed to reach the point where it becomes dangerous, then traffic could and would travel our streets in a safe and sane manner. In the long run, traffic would make faster time by driving at consistent speeds.

One point that is most insistent speeds, important, however, is that in addition to watching and driving the posted speed limit, drivers must make sure they are not impeding traffic. Many times a vehicle is observed driving perhaps only four or five miles an hour under the speed limit in the lane closest to the middle of the street. Because the speed of this vehicle is under the speed limit, vehicles to the rear are unable to drive the maximum speed for that particular zone.

ONE SLOW-moving vehicle can affect the movement of many vehicles, such as causing them to make unnecessary lane changes in attempting to pass.

If you are driving under the posted speed limit, keep to the right side of the street and keep the center of the street open for the faster moving vehicles.

Don't impede traffic even if the other fellow wants to drive over the speed limit; it will be he who becomes involved in the accident or receives the traffic citation, not you.
